## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 18-19, 27, 33-34 and 39 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Lang et al (US Patent 6,046,073).

Lang discloses a process for making semiconductor chips and the chips made thereby. As shown in Fig. 1, a thinned semiconductor chip 1 is arranged on contact surfaces 2 of a leadframe. Electrical connections are formed between contact studs 3 and contact surfaces 2. See col. 2, line 63 through col. 3, line 30. At col. 2, lines 1-15, Lang discloses that the assembly is in normal use in a smart card assembly. In

Art Unit: 1734

addition, it appears from Fig. 1, that chip 1 is applied to the external surface of the card in the manner claimed by the applicant.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 20-22, 28-32, 35-38 and 40-48 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lang et al as described above in paragraph 2 in view of Kohama et al (US Patent 6,412,701).

Kohama discloses a method for incorporating a chip into a smart card. This method involves applying the chip to a surface of the smart card externally. As shown in Figs. 8-9, chip 1 with conductive paths or coils 2 is "hot pressed" in recesses 15 with its front side pointing outside to the surface of the smart card. See col. 12, lines 4-18 and 46-51.

It would have been obvious to one having ordinary skill in the art to hot press the chip into a cavity, as taught by Kohama, in the method and article of Lang in order to produce smart cards with desired physical configurations. In addition, without the disclosure of unexpected results, it is the examiner's position that the protective lacquer and printing technique are well known and conventional in the art and would have been

obvious to employ in the method and article of Lang as described above in order to provide desired protection and to facilitate production of the articles.

***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 29 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 29 recites the limitation "the conductive paths" in line 2. There is insufficient antecedent basis in claim 27 for this limitation in the claim.

***Response to Arguments***

7. Applicant's arguments with respect to claims 18-22 and 27-48 have been considered but are moot in view of the new ground(s) of rejection.

***Telephone/Fax***

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James Sells whose telephone number is (571) 272-1237. The examiner can normally be reached on Monday-Friday between 9:30 AM and 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chris Fiorilla can be reached at (571) 272-1187. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

***Conclusion***

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
